

SmrtMonitorPro

One agent and one console for monitoring, threat detection, backup and patching across your Windows and Linux machines, with one price per machine.

Replaces a stack of tools

Remote management, endpoint security, backup and compliance evidence usually mean four agents, four logins and four bills. SmrtMonitorPro does it with one agent, so the alert, the logs, the patch history and the last good backup sit on the same screen.

Built to tell the truth

Compliance controls with no evidence read “not assessed,” never “pass.” A backup job where one machine failed is “partial,” never green. A threat feed that stops producing data stops counting as coverage.

Runs on

Windows 10, 11 and Server; Linux (.deb and .rpm); Intel/AMD and ARM. Hosted by BuildITSmrt in the United States. The agent connects out only; no inbound ports, no VPN.

What's inside

U1 Monitoring and alerts

Metrics, services, inventory and logs from every machine; uptime checks; alerts to email, Slack, Teams, PagerDuty, SMS and more.

U3 Backup and restore

Full, incremental and differential backups to local, SMB, S3, Backblaze B2 or Azure, with deduplication, encryption and optional immutable copies.

U5 Remote control

Command, shell, SSH and RDP in the browser, screen share and recorded chat, one-click network lockdown. No inbound ports.

U7 AI investigation

Describe a problem in plain English; Claude from Anthropic correlates alerts, logs, metrics and changes and cites the evidence.

U2 Threat detection

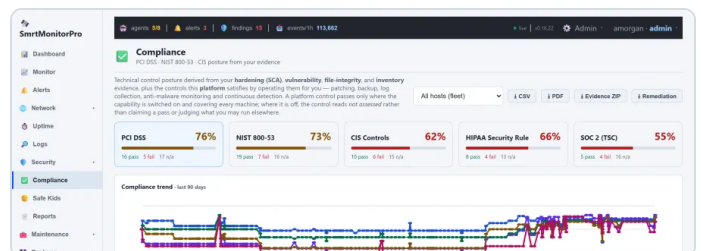

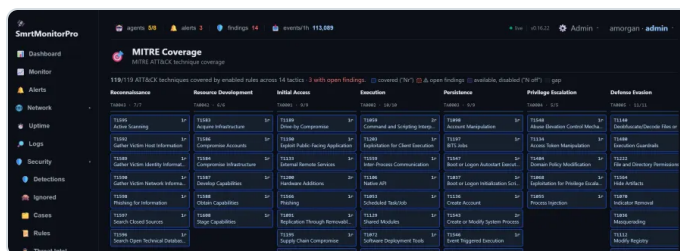

Rules covering all 119 MITRE ATT&CK techniques, 26 threat-intel feeds, anomaly detection against each machine's own history, vulnerability scanning against NVD and CISA KEV.

U4 Patching and maintenance

Windows Update, winget and Chocolatey upgrades, cleanup, disk health and certificate checks, on schedules with deployment rings.

U6 Compliance reports

PCI DSS, NIST 800-53, CIS Controls, HIPAA and SOC 2 from collected evidence, with CSV, PDF and evidence-bundle exports.

Pricing per machine, per month

	Personal	Advanced	Pro	Enterprise
Monthly	\$4	\$9	\$19	\$29
1-year term	\$3.33	\$7.50	\$15.83	\$24.17
3-year term	\$3	\$6.75	\$14.25	\$21.75
Machines	Up to 5	Up to 25	Up to 250	Unlimited

Personal covers your own machines at home; Advanced adds backup, endpoint security and remote access; Pro adds threat detection, compliance and AI investigation; Enterprise adds separate workspaces per site or department and single sign-on.

14-day free trial on 3 machines with every feature. Early access:
